# COOLER SERVICE KIT

---

## 2906039500

Worn seals and components directly affect efficiency. Replacing them helps maintain stable pressure output, smooth operation, and overall airflow quality. With proper sealing and filtration, the compressor's moving parts stay protected from dust, moisture, and friction-related wear.

### **Function of the 2906039500 Kit**

Industrial compressors operate under demanding conditions every single day, making preventive maintenance the key to long-term reliability. The 2906039500 Maintenance Kit is specifically designed to deliver all the critical components required for scheduled servicing, ensuring your compressor continues to run smoothly, efficiently, and safely.

# TECHNICAL SPECIFICATION

Parameter	Typical Value / Range
Component Type:	Cooler service kit(2906039500)
Components in the kit:	Gasket,Bolts,Multiple O-Ring and Seal Washers.
Primary function:	The 2906039500 Maintenance Kit ensures that your compressor remains dependable during each maintenance cycle, keeping your plant or workshop running without interruptions.
Function:	Improved Efficiency,Reduced Energy Costs,Lower Maintenance Expenses,Increased Operational Safety,Longer Equipment Lifespan.
Improves:	With proper sealing and filtration, the compressor's moving parts stay protected from dust, moisture, and friction-related wear.
Prevention:	Prevent leakage from the system.

## **Technical support 24/7**

We offer 24/7 technical support to ensure quick assistance whenever needed. Our team is always ready to help with product setup, troubleshooting, and urgent service requests.

## **Consultation**

Need help choosing the right product? We provide expert consultations to guide you through selection, technical compatibility, and project-specific requirements.  
Warranty

## **Product Warranty**

All parts come with a minimum warranty against all manufacturing defect. We guarantee the quality and reliability of every product supplied.
