Air & Gas Compressor and Parts

INLET VALVE BEARING BLOCK KIT

2906049900

The 2906049900 Kit is designed to support scheduled preventive servicing of the compressor system. Its primary function is to restore optimal sealing, maintain airflow efficiency, and protect internal components by replacing parts that naturally degrade during operation.

Function of the 2906049900 Kit

Replaces worn elements that affect the compressor's ability to maintain consistent pressure and output. Maintains correct lubrication flow and prevents wear, friction, and overheating on key mechanical parts. Ensures all required consumables are replaced during scheduled service intervals, reducing the risk of unexpected shutdowns.

TECHNICAL SPECIFICATION

Parameter	Typical Value / Range
Component Type:	Inlet valve bearing block kit(2906049900)
Components in the kit:	Washers, Bearing block, Ring, Shaft and lock nut.
Primary function:	replaces worn elements that affect the compressor's ability to maintain consistent pressure and output.
Function:	Ensures all required consumables are replaced during scheduled service intervals, reducing the risk of unexpected shutdowns.
Improves:	Keeps the compressor operating efficiently while minimizing long-term maintenance
Prevention:	Prevent the system.

Technical support 24/7

We offer 24/7 technical support to ensure quick assistance whenever needed. Our team is always ready to help with product setup, troubleshooting, and urgent service requests.

Consultation

Need help choosing the right product? We provide expert consultations to guide you through selection, technical compatibility, and project-specific requirements.
Warranty

Product Warranty

All parts come with a minimum warranty against all manufacturing defect. We guarantee the quality and reliability of every product supplied.
