Air & Gas Compressor and Parts

MAINTENANCE KIT

2906074100

complete service kit means that all critical components are replaced in one go, minimizing the chances of missing any part during maintenance. This helps avoid unplanned downtime due to partial maintenance.

Makes maintenance more predictable and easier to plan (single part-number for the whole kit).

Function of the 2906074100 Kit

By ensuring that filters and separators are functioning properly, the compressor can maintain its designed efficiency. Dirty filters or worn separators can cause a pressure drop, reducing efficiency and increasing energy consumption.

Sealing & Integrity

The kit also includes O-rings, gaskets, or seals to re-seal filter housings, separator housing, and other relevant compartments. This ensures no leaks after servicing, which is crucial for pressure integrity and preventing oil or air leakage.

TECHNICAL SPECIFICATION

Parameter	Typical Value / Range
Component Type:	Maintenance Kit (2906074100)
Components in the kit:	Oil Separator Element,Air filter element,Oil separator element, O-Ring,Gasket,Seals
Body Material:	Industrial-grade rubber + steel reinforcement
Function:	Air Quality & Oil Separation Contains an oil-separator element (among other parts) that helps separate lubricating oil from compressed air.
For operators:	Ensures that regular maintenance is done thoroughly, helping avoid hidden failures.
For energy management:	Keeps the compressor efficient, reducing power wastage due to pressure drop or oil contamination.

Technical support 24/7

We offer 24/7 technical support to ensure quick assistance whenever needed. Our team is always ready to help with product setup, troubleshooting, and urgent service requests.

Consultation

Need help choosing the right product? We provide expert consultations to guide you through selection, technical compatibility, and project-specific requirements.
Warranty

Product Warranty

All parts come with a minimum warranty against all manufacturing defect. We guarantee the quality and reliability of every product supplied.
