

# SEAL KIT

---

## 2906057800

The primary function of the 2906057800 maintenance kit is to ensure the reliable, efficient, and uninterrupted operation of the compressor by providing the essential components required for scheduled service.

### **Function of the 2906057800 Kit**

Restoring proper sealing and airflow integrity.

Reducing leaks and preventing contamination.

Maintaining consistent compressor output.

Enhancing the lifespan of internal components.

Ensuring smooth, trouble-free operation during scheduled maintenance cycles.

# TECHNICAL SPECIFICATION

Parameter	Typical Value / Range
Component Type:	Seal kit(2906057800)
Components in the kit:	Multiple washers and seal washers.
Primary function:	The 2906057800 kit is a complete set of high-quality replacement parts designed for periodic compressor servicing. Every item in the kit plays a vital role in maintaining the compressor's internal health.
Function:	Increased compressor life.Reduced unplanned downtime. Improved energy efficiency.Lower long-term maintenance cost. Ensured safety and operational reliability.
Improves:	Air and oil leakage inside the compressor not only reduces performance but also increases energy costs. The kit's sealing components ensure airtight internal operation.
Prevention:	Prevent leakage from the system.

## **Technical support 24/7**

We offer 24/7 technical support to ensure quick assistance whenever needed. Our team is always ready to help with product setup, troubleshooting, and urgent service requests.

## **Consultation**

Need help choosing the right product? We provide expert consultations to guide you through selection, technical compatibility, and project-specific requirements.  
Warranty

## **Product Warranty**

All parts come with a minimum warranty against all manufacturing defect. We guarantee the quality and reliability of every product supplied.
