Air & Gas Compressor and Parts

DEMISTER PAD

1617506010

The 1617506010 Demister Pad is a high-efficiency mesh separator designed to remove oil mist and fine aerosols from the compressed air/oil mixture inside the compressor's separator tank. It ensures clean air separation, reduces oil carryover, and helps maintain optimal compressor performance.

1. Key Features

High-efficiency multi-layer wire mesh

Optimized density for oil aerosol separation

Corrosion-resistant stainless steel mesh

Long operating life with minimal maintenance

Designed to handle high airflow and pressure

Low pressure drop for energy-efficient operation

TECHNICAL SPECIFICATION

Parameter	Typical Value / Range
Component Type:	Demister Pad / Oil Mist Mesh
Material:	Stainless steel knitted wire mesh
Mesh Density:	Multi-layer structured density
Working Pressure:	Up to 10–13 bar
Temperature Range:	–20°C to 220°C
Oil Separation Efficiency:	Up to 99% (for fine mist & aerosols)

Technical support 24/7

We offer 24/7 technical support to ensure quick assistance whenever needed. Our team is always ready to help with product setup, troubleshooting, and urgent service requests.

Consultation

Need help choosing the right product? We provide expert consultations to guide you through selection, technical compatibility, and project-specific requirements.
Warranty

Product Warranty

All parts come with a minimum 6-Month warranty against all manufacturing defect. We guarantee the quality and reliability of every product supplied.
